Flexible Options for Providers and Patients

HFLEX is a fully customizable program from HealthFirst Financial, where providers receive immediate funding for self-pay balances, while enabling their patients to make manageable monthly payments over time. With HFLEX, providers have the freedom to determine which patients qualify, whether to charge patients low or no interest, and the term length (up to 60 months).

HFLEX works directly with the health system to create a customizable plan to fit the needs of the community. By eliminating credit requirements, every patient becomes eligible to take part in the program. Upon patient acceptance, the healthcare provider will receive same-day funding of up to 100% of the self-pay balance. This immediate cash reduces A/R days and helps to eliminate bad debt.

HFLEX provides all account monitoring, follow-up, and billing services, allowing providers to concentrate on what matters most - their patients. Patients with on-going care may easily add charges to their HFLEX account, ensuring one convenient monthly payment. With HFLEX's program flexibility, providers are able to improve their revenue cycle, while providing an opportunity for their patients to meet their self-pay obligations.
